IN THE SPECIFICATION:

Paragraph beginning at line 4 of page 2 has been amended as follows:

(1) ~~editing~~ Editing of user interface such as an operation menu.

Heading at line 19 of page 5 has been amended as follows:

DETAILED DESCRIPTION OF THE PREFERRED ~~EMBODIMENT~~ EMBODIMENTS

Paragraph beginning at line 20 page 5 has been amended as follows:

A first embodiment of this invention will be described in the following based on the drawings. Fig. 1 is a block diagram of an embodiment of the present invention. An analyzer system is realized as hardware such as a personal computer, and software running on this hardware, and Fig. 1 shows function relating to the gist of the present invention inside the analyzer system extracted as blocks. The analyzer system itself can be either built-in to an analyzer, or separated from the analyzer. In the event that it is separated from the analyzer, the analyzer system is connected to the analyzer by a communication line or storage media etc.

Reference numeral 4 in Fig. 1 ~~is~~ <u>represents</u> analyzer software 4 bearing the main burden of the analysis. This analyzer software 4 has all or some of the functions described in the following.

Paragraph beginning at line 23 of page 10 has been amended as follows:

In this way, by setting the function call information 6 <u>in advance</u>, the instructions to the analyzer software 4 can be reduced. If the function call information 6 is not set <u>in advance</u>, the analyzer software 4 is used in a normal interactive mode for selecting menus and icons.
